

PERSONAL PORTOFOLIO

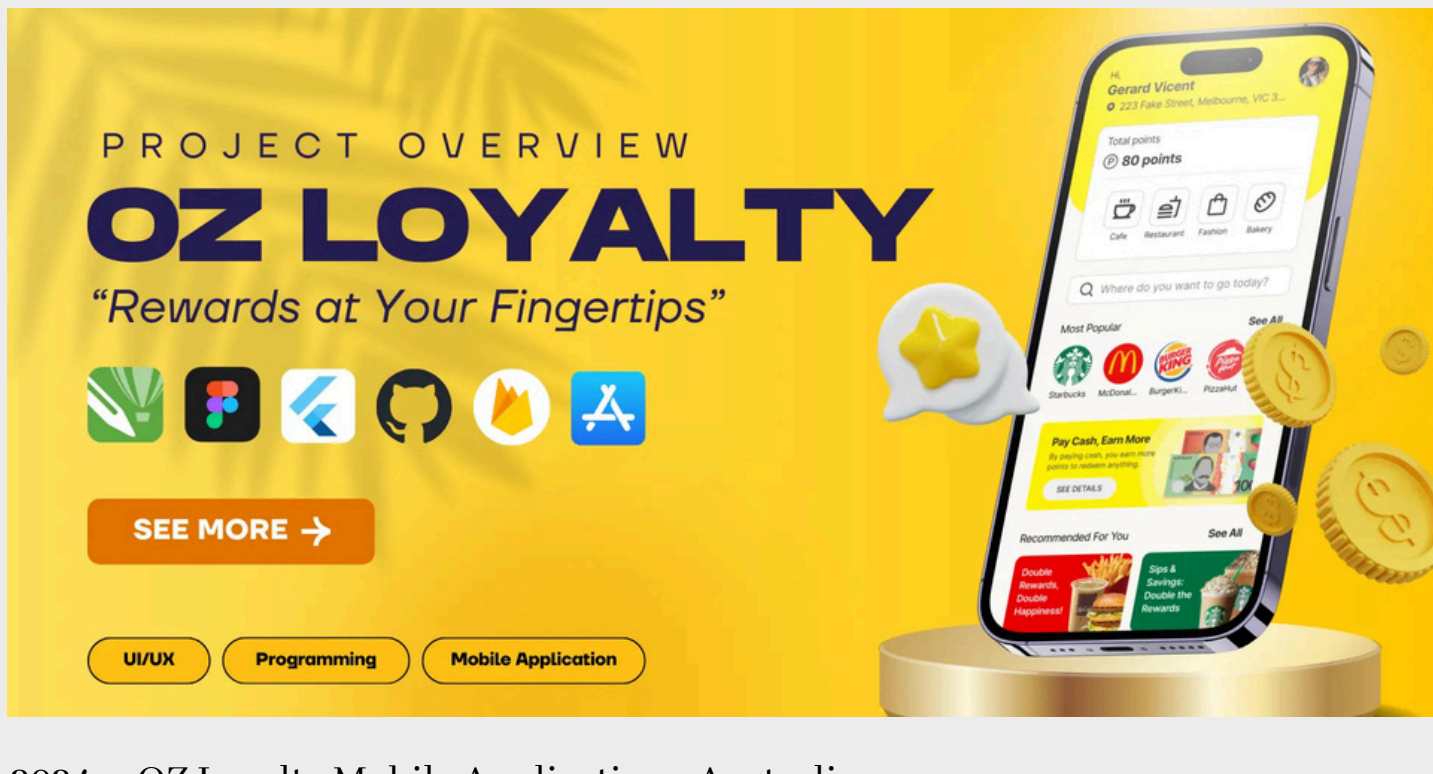

Jeremy Kenneth Harnanto

Full Stack Developer

ABOUT ME

Hello! I'm Jeremy, a Full Stack Developer with 2.5 years of experience building web and mobile applications. My go-to tech stack is Laravel for backend development and Flutter for cross-platform mobile apps. Backed by a strong academic foundation (3.63 GPA), my coding philosophy is straightforward. I focus on writing clean, efficient code that delivers real, user-centric solutions.

MY PORTOFOLIO

2024 – OZ Loyalty Mobile Application - Australia

Link : [Prototype OZ Loyalty Mobile Apps](#)

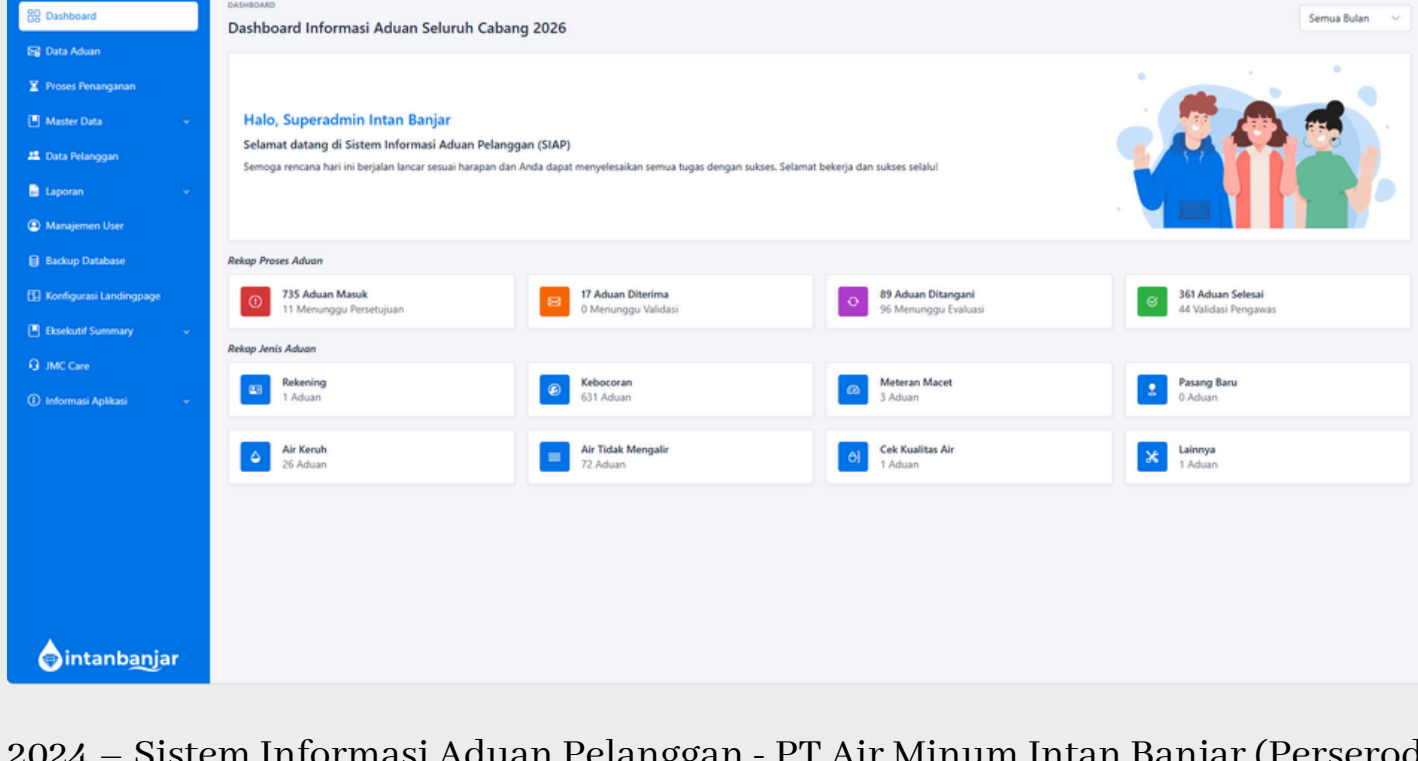

- Summary: A mobile application designed to reward users with loyalty points and exclusive perks to boost customer retention and engagement in Australia.

- Context: Professional client project.

- Role: Group Project (Team of 3) - Mobile Developer.

- Impact: Engineered a scalable system and designed a structured database architecture to securely handle daily reward transactions and user activities.

- Learnings: Deepened my expertise in designing complex Entity-Relationship Diagrams (ERD), creating detailed task scenarios, and structuring efficient database tables from scratch.

2024 – Sistem Informasi Aduan Pelanggan - PT Air Minum Intan Banjar (Perseroda)

Link : [Website Sistem Informasi Aduan Pelanggan Intan Banjar](#)

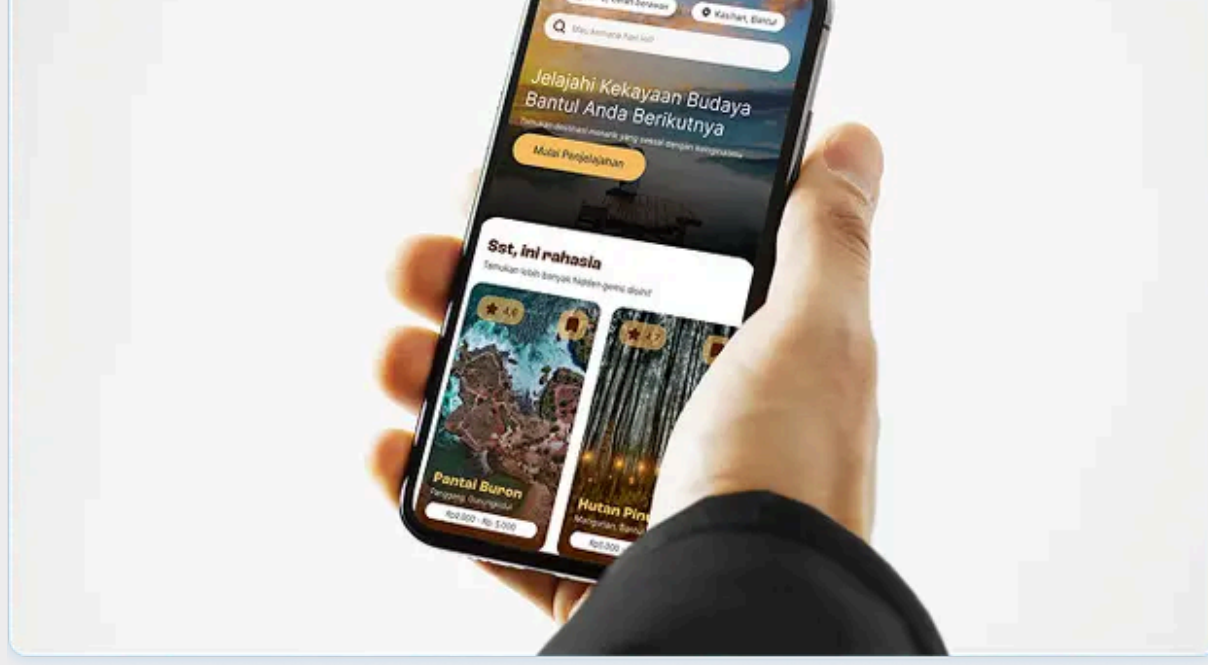

- Summary: A comprehensive customer complaint management system designed for a regional water utility company to streamline issue reporting and resolution workflows.

- Context: Professional client project (Corporate/BUMD) developed during my tenure at JMC Indonesia.

- Role: Group Project (Team of 5) - Backend Developer.

- Impact: Significantly improved the client's operational efficiency by providing a centralized digital platform to seamlessly monitor complaint statuses, manage customer data, and track handling processes. It also empowered citizens with a highly accessible channel to report water-related issues.

- Learnings: Gained deep insights into the end-to-end operational workflow of public utility complaint handling. I also expanded my technical skill set by successfully integrating a WhatsApp API to facilitate real-time, automated communication between the system and field technicians.

2025 – Discover Bantul Mobile Application - Dinas Pariwisata Kabupaten Bantul

Link : [Prototype Discover Bantul Mobile Apps](#)

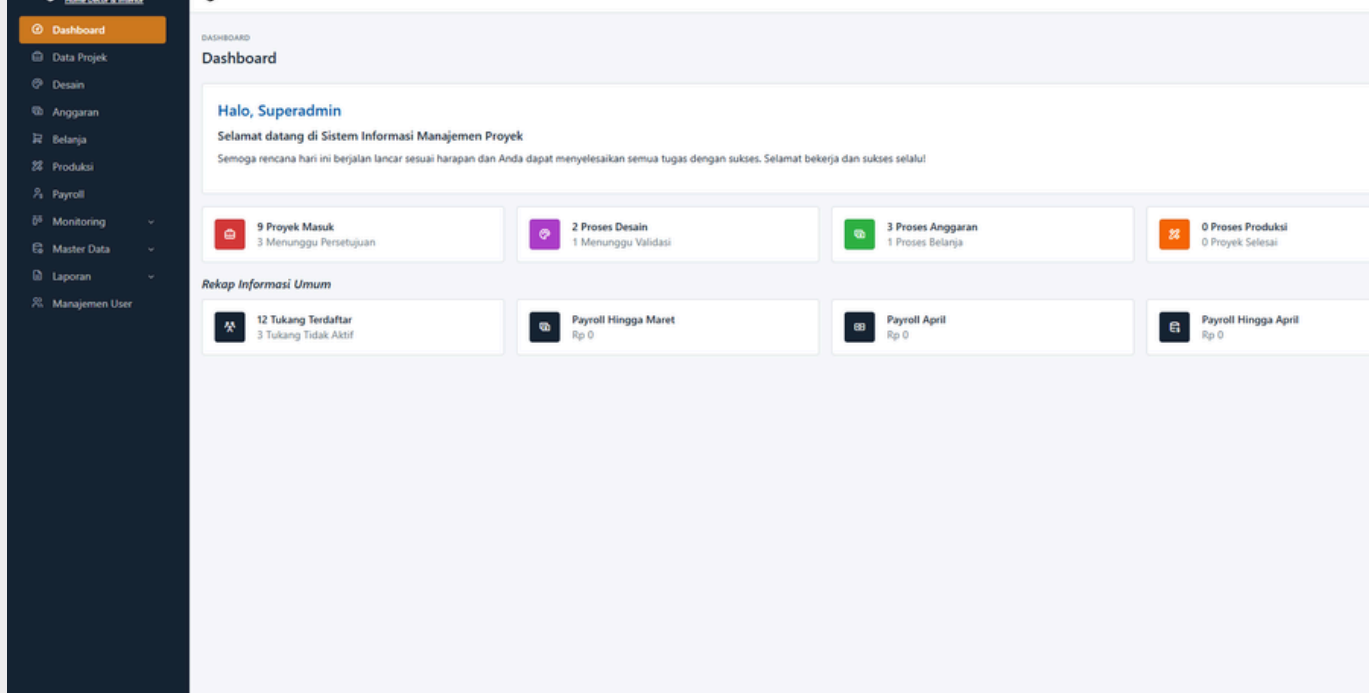

- Summary: A digital tourism platform developed directly for the Bantul Tourism Office to promote local destinations, cultural heritage, and regional events.

- Context: Professional client project (Government Sector).

- Role: Group Project (Team of 3) – Lead Mobile Developer.

- Impact: Successfully delivered an accessible mobile platform that enhances the tourism experience for visitors while providing the local government with a reliable digital tool to boost regional economic engagement.

- Learnings: Gained invaluable experience in stakeholder management through direct collaboration and consultation with a government entity, while also honing my leadership skills in managing mobile development workflows alongside a Project Manager and a Backend Developer.

2025 – Sistem Informasi Manajemen Proyek - Dynamics Home Decor & Interior

Link : - (Personal Client Project)

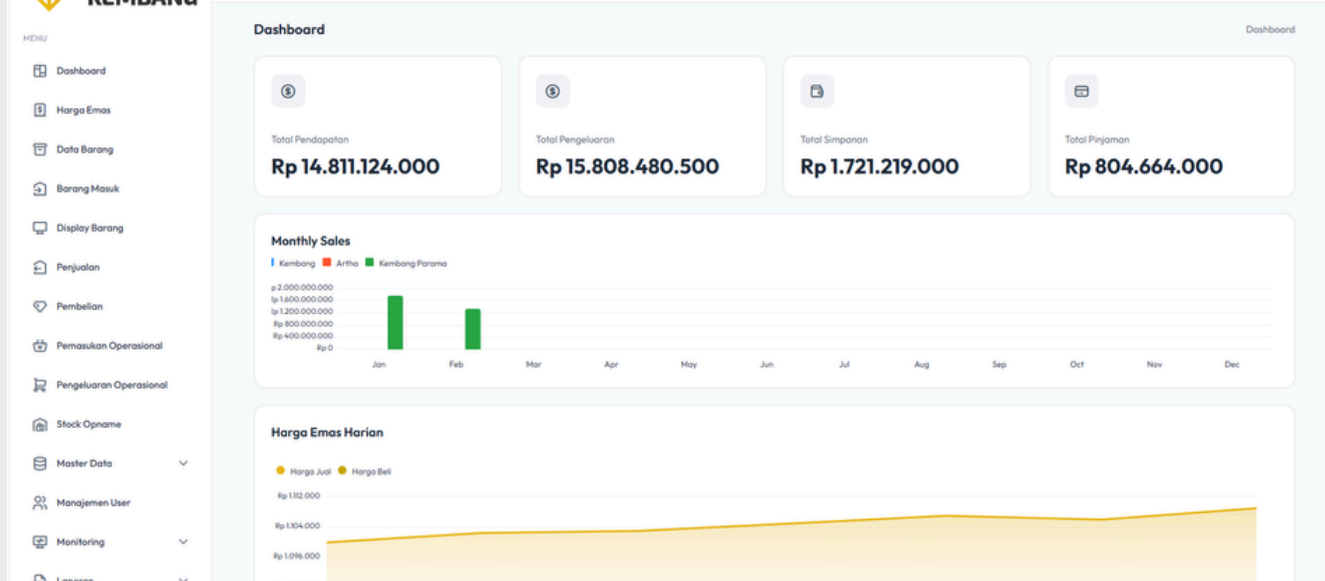

- Summary: A customized internal management system tailored specifically for an interior design and home decor business to streamline their project budgeting and daily operations.

- Context: Professional client project.

- Role: Group Project (Team of 4) – Project Manager & Backend Developer.

- Impact: Optimised the client's daily operations by delivering custom modules tailored to their real-world workflows, specifically improving the accuracy and tracking of raw material procurement and interior construction budgets.

- Learnings: Expanded my industry knowledge into the civil and interior design sectors. I gained practical experience in translating complex Bill of Quantities (RAB), project data, and budgeting workflows into a structured digital system.

2026 – Sistem Penjualan, Simpan Pinjam, Stok Barang - Toko Emas Kembang

Link : - (Personal Client Project)

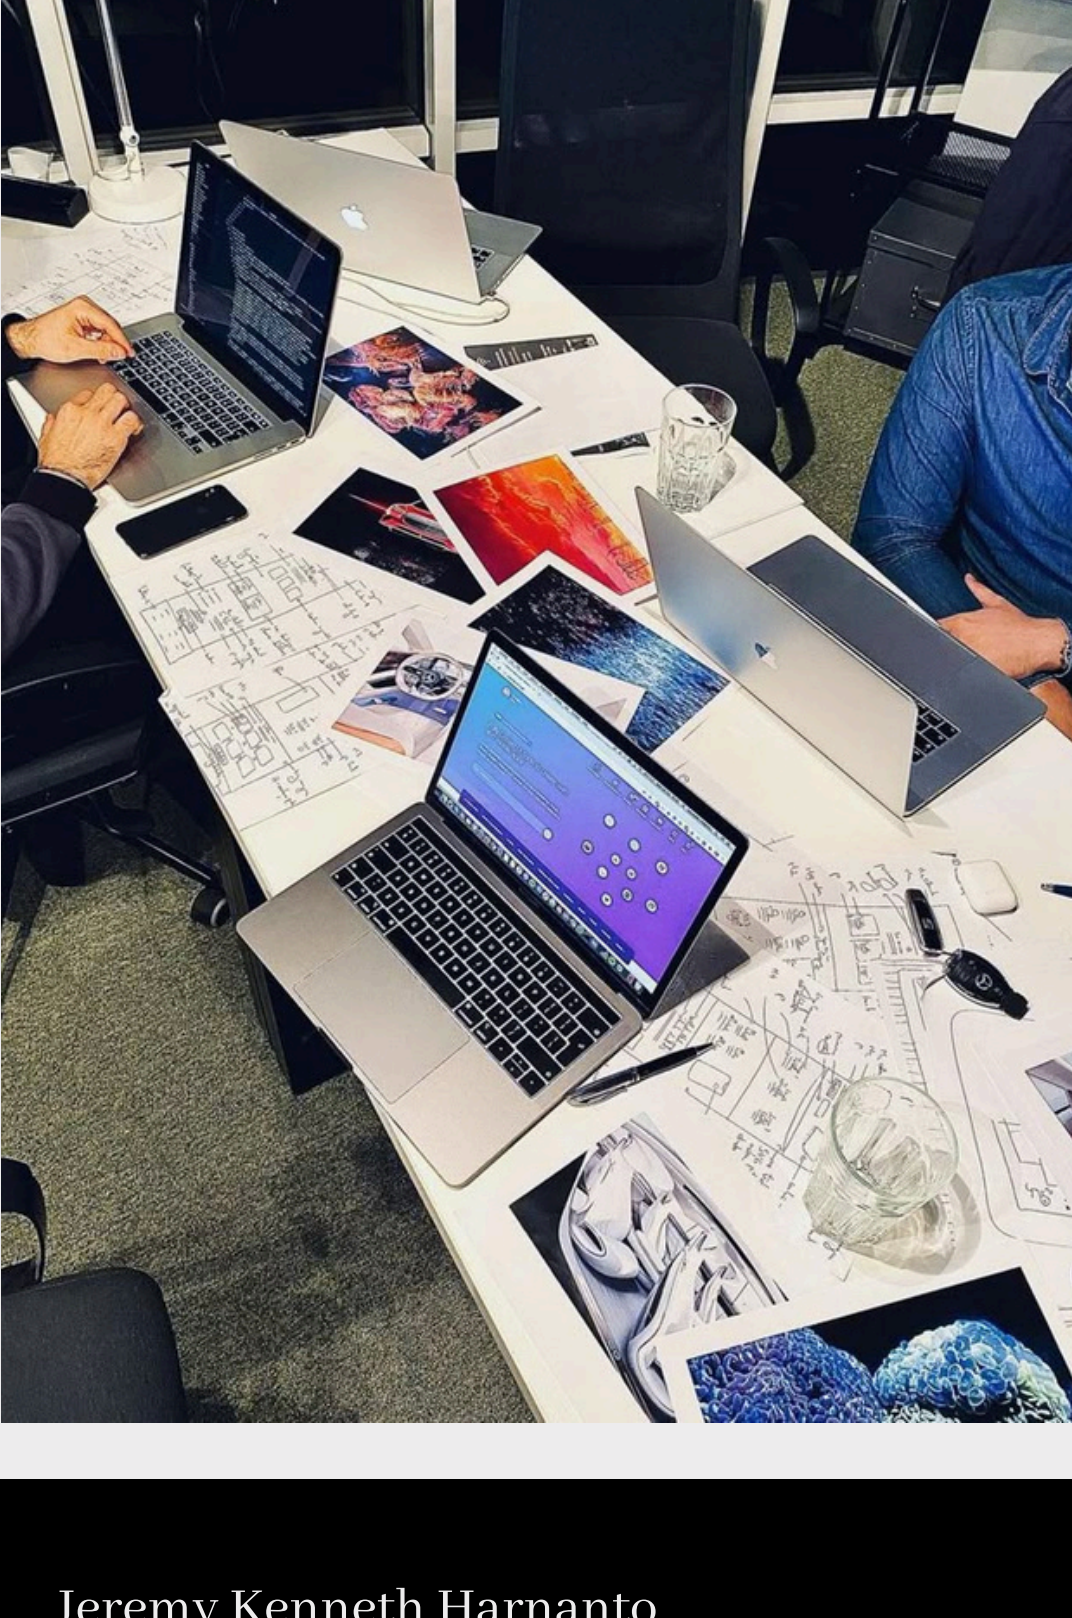

- Summary: A comprehensive internal management system designed to digitize and automate the daily operations and financial workflows of a jewelry retail business.

- Context: Professional client project.

- Role: Group Project (Team of 4) – Project Manager & Backend Developer.

- Impact: Successfully transformed manual processes into a robust, real-time digital ecosystem, enabling the client to efficiently manage live gold price adjustments, inventory tracking, financial reporting (income/expenses), and sales transactions within a single unified platform.

- Learnings: Mastered the art of leading a multi-disciplinary team while simultaneously architecting a complex backend. I also gained deep domain expertise in retail accounting and the intricate logic of savings-and-loan management systems.

EXPERIENCE

Project Manager & Backend Developer - Simetri Dev

June 2025 - Present

Yogyakarta, Indonesia - Self Employed (Freelance)

Backend & Mobile Programmer - JMC Indonesia

Apr 2024 - Apr 2025

Yogyakarta, Indonesia - Contract (Full-Time) - On-Site

Cloud Computing - Bangkit Academy 2023 by Google, GoTo, Traveloka

Aug 2023 - Jan 2024,

Bandung, Indonesia - Certified Independent Study (MSIB) - Remote

EDUCATION

S1 Sistem Informasi

2021 - 2025, Universitas Pembangunan Nasional Veteran Yogyakarta (3.63 / 4.00)
